## Advanced Installer License V 16.4.1 Patch

version 19.1. Released January 20, 2022 New option in Updates view: Create GUIDs for all components; New type of search in advanced search. New types of templates can be created in the Templates view and can be used to create new elements. You can also delete old templates in the Templates view. In the Templates view, you can now enable the Don't save to database option. To do this, you need to add a flag to the "Settings" window and select the "Do not save to database" option when working with templates. New options have also been added to the Templates view: Remove Only and Add Only.
