Visual LISP Visual LISP is an API designed to allow the creation of products to extend the functionality of AutoCAD. In this case, Visual LISP is meant to complement AutoCAD. Visual LISP is implemented as a macro language that is based on AutoLISP and supports: Function creation Drawing and writing text into a specified window Drawing and editing of objects on a line and polygon Creating and editing a drawing history Macros can be called from anywhere and stored as part of a drawing. The complete code of a macro can be saved as a stand-alone file. Macros are stored on the computer disk in a file format that is more compact than the AutoLISP files. Also, they have a C++ and Visual Basic equivalent. Drawing from VBA, through the use of Visual LISP In the case of Visual LISP, it is not actually necessary to save a drawing, or to change the drawing mode of AutoCAD. A macro can be called to open the drawing and start working in the area specified. Direct access to AutoCAD objects Visual LISP was made available by Autodesk under an academic license. Now Visual LISP is available in many CAD systems, such as Autodesk AutoCAD, Autodesk Alias, Autodesk AutoCAD LT, Autodesk Architect, Autodesk AutoCAD Mechanical, Autodesk AutoCAD Electrical, Autodesk AutoCAD Civil, Autodesk Inventor, Autodesk Inventor Professional, Autodesk Navisworks, Autodesk Revit, Autodesk Revit LT, Autodesk Architectural Desktop, Autodesk AutoCAD Map 3D, Autodesk Civil 3D, Autodesk Autocad 360, Autodesk Architecture 2013, Autodesk Map 3D 2013, Autodesk Navisworks 2013, Autodesk AutoCAD H&S. Visual LISP was discontinued by Autodesk in 2018. VBA VBA is an integrated development environment (IDE) for Microsoft Windows, developed by Microsoft. It allows the creation of custom Windows applications, which use Visual Basic for Applications (VBA) as their programming language. AutoCAD can be programmed to enable VBA functionality in it. VBA can be used to automate AutoCAD, and to customize its user interface. a1d647c40b
