Pixel Puzzles Ultimate is the definitive jigsaw puzzler for the PC platform. Over twenty totally handcrafted levels of puzzle adventure await, with over two dozen unique puzzles and puzzles to master. Whether you are at a young age, or the avid puzzle enthusiast, Pixel Puzzles Ultimate delivers a fun, challenging, and accessible puzzle game. Dragons & Knights is a one-player board game designed by Michael Kiesling, designer of Mage Knight for 4th edition D&D. In it, you play the role of a dragon and hack and slash your way through a fantasy board. This is the first time the original version of Dragons & Knights has ever been made available on STEAM. Here is some more information on the game from Michael Kiesling: "Laced with humor and plenty of depth, this playable board game lets you take on a veritable army of fantasy villains who have laid siege to your lair, and you must slay your way through them all before they kill you. It's a single-player, fantasy boardgame that was previously only available as an app, and now you can experience it entirely on your PC. You'll be able to hack and slash your way to the villainous bottom of the dungeon, where they await to be slain by you and your dragon comrades. However, before that happens, you'll have to fight your way past an assortment of monsters, traps, and minions of evil; everything from the common illithid to the fearsome Queen of Thrones. As a boardgame, the game has a new cast of characters, a new dungeon layout, and a new set of mechanics and rules. As a single-player game, there's also a new story, which can be played if you haven't seen the app version before. You can choose to play the story of one of three adventurous dragonborn, each with their own personality and backstory." For more information on the game you can check out its website here: Find year starting from 1990 to 1995 (where year must be in 2 digit) I need to generate data with year in 2 digits (1990 to 1995). The objective is to find the purchase of an item. I get data from a table with a column with type integer. The column 'year' represents the purchase year and it has a type number 1,2, c9d1549cdd
